Itaca

POUF

Itaca pouf is a furnishing accessory designed to complement the armchair in the same collection and to create a complete outdoor relaxation set. It belongs to Itaca collection, adopting its slatted wooden structure and organic design language.

The structure consists of two amorphous frames joined by wooden rods disposed in a regular sequence. These elements support a cushion with a soft, enveloping profile.

The contrast between the open wooden structure and continuous upholstery gives the pouf visual lightness and comfort. It is intended to serve as a footrest alongside Itaca armchair.

Itaca is designed for terraces, verandas, boats and covered, protected outdoor spaces, but it is also suitable can for contemporary interiors.

Handmade in Italy, Itaca interprets outdoor furniture through structural lightness, comfort and coordination with the collection of the same name.

The **Hessentia Outdoor collection** is designed and intended exclusively for use in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
