

Cheope

TABLE

Generated: 25/05/2026

The peculiarity of the table Cheope lies in the eccentric decoration that covers the conical base, the designer's artistic expression. A thin metal sheet is molded thus creating a surface with a strong three-dimensionality emphasized by a chromatic finish that enhances its texture. Available in different chromatic finishes to obtain the best match with the type of marble chosen. Particularly suitable for a small dining area, it has also a valid location in the entrance halls of villas or boutique hotels.
