Eddy

NIGHT TABLE

Generated: 22/11/2026

Eddy is a compact night table characterized by soft lines, rounded shapes and circular geometry. Its essential composition brings together a lacquered structure and marble surfaces.

The cylindrical structure creates a continuous surface without evident edges. The round shape allows the night table to interact naturally with upholstered beds featuring curved lines and with interiors defined by organic geometries.

Eddy night table is available in different lacquer finishes. Colour covers the structural elements and can be selected to create continuity or contrast with the other furnishings in the bedroom.

The marble surfaces introduce natural veining and variations and are characterized by a tactile, unique material quality. The relationship between the compact lacquered finish and the pattern of the stone defines the identity of the product.

Its compact dimensions make this night table suitable even for bedrooms where lateral space is limited, without giving up two distinctive supporting surfaces.

Handmade in Italy, Eddy interprets bedroom storage through circular shapes, colour and the uniqueness of marble.
