Wabi

ARMCHAIR

Generated: 04/11/2026

The Wabi armchair is a real functional sculpture, a work of art that inhabits space with a powerful and radical presence. Inspired by Bauhaus design principles, it plays with pure geometric blocks and essential volumes, translating the aesthetics of form following function into an object with a strong visual impact. It is proposed in white cement, a material capable of expressing great materiality. The poetic austerity of the material and its dry and rigorous architectural lines give the armchair a minimal and timeless elegance, capable of redefining any environment with a sculptural and contemporary strength.

If the product is intended for **outdoor use**, it should be used exclusively in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
