Kumo

COFFEE TABLE

Kumo transforms the simplicity of concrete into an expressive element through an organic, fluid and monolithic shape inspired by nature. Its compact volume has a sculptural presence that sits naturally in living ambiences and covered, protected outdoor spaces, in both residential and contract contexts.

The visually porous surface enhances the texture of concrete, making the material tactile and visually strong. Each table expresses solidity and authenticity while retaining a soft, versatile shape that is easy to arrange in harmonious combinations.

Available in different sizes and colours, Kumo can be used individually or in sets of several pieces. Within HESSENTIA's design language, it is a minimal, sculptural coffee table for protected outdoor settings and contemporary living spaces where material, shape and natural character engage in balance.

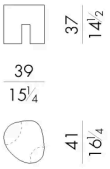

The **Hessentia Outdoor collection** is designed and intended exclusively for use in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
