Laryssa

BED

Laryssa is a contemporary upholstered bed characterized by a headboard composed of two distinct panels with sinuous lines. The configuration balances symmetry, softness and tailoring precision.

The two panels form a broad headboard without turning it into a uniform surface. The central separation makes the composition clearly visible and allows the lateral curves to follow the profile of the bed.

Elegant handmade tailored stitching runs around the entire perimeter of the headboard. The workmanship emphasizes the shape of the panels and reveals the precision required to follow the curved lines continuously.

The upholstery becomes the main feature through which the design is perceived. The stitching is not concealed, but highlighted as a defining element capable of shaping the edge, thickness and identity of the headboard.

This bed is suitable for contemporary bedrooms seeking a soft yet visually ordered element. Its balanced proportions allow it to be coordinated with night tables, benches and accessories with more minimal shapes.

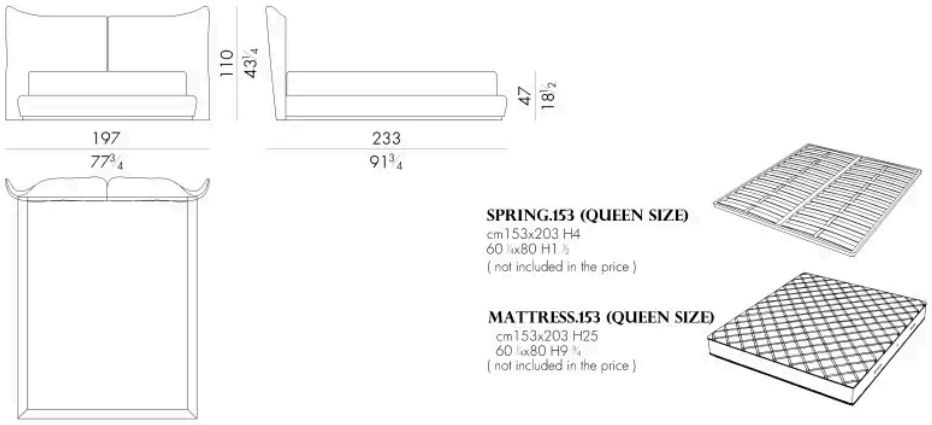

The availability of different sizes allows the bed to accommodate international mattress dimensions and to adapt to residential or contract projects.

Handmade in Italy, Laryssa interprets bedroom design through sinuous shapes, upholstery and hand-executed perimeter stitching.
