Jodie

SOFA

The Jodie sofa is a daring reinterpretation of the iconic English Chesterfield, characterized by the distinctive button-tufted upholstery extending over the entire surface.

This sofa is the result of meticulous research into shapes and workmanship, characteristic features of HESSENTIA, which has made material experimentation its strong point. Its creation is a masterpiece of craftsmanship, the result of a remarkable technical complexity that expresses the mastery of workmanship.

The sofa's silhouette is distinguished by its soft and fluid contours, evoking a dynamic sculpture reminiscent of Zaha Hadid's architectural language.

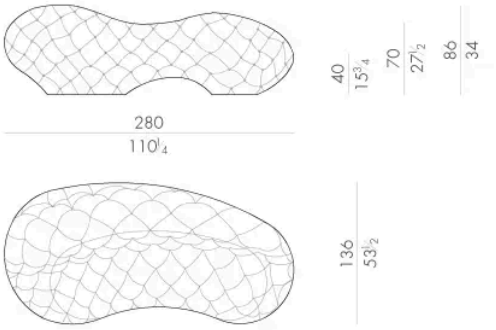

Ideal for large living areas, Jodie gives the domestic environment an unusual atmosphere, imposing itself as the absolute protagonist of the space thanks also to a play of light and shadow alternating on its surface.
