Tita

CHAIR

Generated: 04/11/2026

Tita is a contemporary chair with soft, circular shapes, defined by a lacquered structure that wraps around the upholstered seat in a minimal, recognisable design.

The design arises from the meeting of simple geometries and balanced proportions. Three elements with crescent-shaped cross-sections and rounded corners support the seat.

The taller rear element supports the curved backrest and completes the enveloping silhouette. Continuity between structure and backrest creates a fluid shape that provides support and comfort while retaining visual lightness.

In the lacquered version, uniform colour enhances the purity of the geometry and reveals the relationship between the three structural elements. The finish can be selected among a wide range of shades in the HESSENTIA collection, allowing tonal continuity or contrasts with the seat upholstery.

The upholstery can be customised with textured fabrics and different colour combinations, adapting Tita to contemporary dining rooms, living areas, restaurants and hospitality projects.

Handmade in Italy, Tita interprets the contemporary chair through a balance of circular form, lacquered structure, comfort and customisation.
