Itaca

ARMCHAIR

Itaca outdoor armchair is a product which blends design and art, characterised by a sinuous silhouette that recalls organic shapes. Its curved lines and enveloping volumes seem to mould around the body, offering unique comfort. The structure is made of multilayer wooden rods arranged like slats, on which rests a cushion with an enveloping design.
Designed to enhance panoramic terraces, large verandas and boats, it can also be used indoor.
We recommend the use of the Safe Cover, ideal for maintaining the quality of the materials.
For a total relaxation experience, the combination with the pouf from the same collection is the ideal choice.

The **Hessentia Outdoor collection** is designed and intended exclusively for use in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
