Itaca

ARMCHAIR

Generated: 24/11/2026

Itaca is an outdoor armchair with organic, sinuous shapes, designed to provide a generous, enveloping and visually light seat. Its profile develops through continuous curves that follow the body and create a soft presence intended for covered terraces, verandas, porticos and protected hospitality spaces.

The structure is composed of wooden rods disposed in a regular sequence that defines the volume of the armchair and lightens its perception. The wooden elements follow the curve of the back and armrests, creating an open weave in which structure, shape and decoration blend seamlessly.

Within this enveloping architecture, the upholstered cushion introduces a soft and welcoming component. The contrast between the precision of the wooden structure and the continuity of the padding creates a balance between support, comfort and visual lightness.

The deep proportions encourage a relaxed posture, while the organic silhouette allows the armchair to interact with the surrounding ambience and architecture. Itaca can be paired with the coordinated pouf to create a composition dedicated to relaxation.

Handmade in Italy, Itaca interprets outdoor furniture within the HESSENTIA world through formal research, wood craftsmanship and attention to comfort. The collection is intended for covered outdoor spaces protected from the elements and can also be used in contemporary interiors.

The **Hessentia Outdoor collection** is designed and intended exclusively for use in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and

cts over time, weekly routine

maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
