Hug

POUF

Hug pouf is a square furniture accessory defined by two upholstered seats separated by a central marble block that serves as a support surface. It belongs to Hug collection, embracing its soft volumes and three-dimensional embroidery with diamond pattern.

The composition alternates between upholstered elements and marble. Marble introduces veining, colour variations and a more precise presence, while the upholstered sections offer comfort and tactile depth.

Part of the seat is enhanced by a three-dimensional embroidery with diamond pattern, a recurring tailoring feature of Hug collection. This craftsmanship enlivens the surface and visually distinguishes the pouf's different areas.

Hug is available in leather or fabric and can be placed at the centre of the living area, in the bedroom or within a large walk-in closet. Its generous size makes it suitable as a seat, compositional element and support surface at the same time.

Handmade in Italy, Hug interprets the furnishing accessory through a dialogue between upholstery, marble and tailoring craftsmanship.
