

A bookcase born from a fold—a precise and delicate gesture inspired by the art of origami. The metal surfaces are shaped to create dynamic volumes, a play of light, and a perfect balance between solids and voids. The broken lines create a composition that is both harmonious and visually light, yet structurally solid. Two modules are available, designed for flexible combinations that adapt seamlessly to the wall. More than just furniture, it is an exercise in balance between form and material—a creative gesture that transforms functionality into art.
