Cheope

COFFEE TABLE

Cheope coffee tables adopt the sculptural design concept of the HESSENTIA table collection of the same name, reinterpreting it on a more intimate scale for living compositions. Its identity arises from the three-dimensional decoration of the base, where a thin metal sheet is shaped into a vibrant, irregular surface rich in visual depth.

The colour finish enhances the base texture and allows refined combinations with the selected marble. The contrast between the natural top and expressive metal creates a sophisticated balance in which material, light and colour engage intensely.

Available in different sizes, heights and shapes, Cheope can be used individually or combining of several pieces, creating dynamic, customised living settings. Within HESSENTIA's world, this decorative, sculptural coffee table brings the textured look of the dining collection into the living space.
