

The coffee tables from the Axon collection, designed by Hessentia, reinterpret the technique of Venetian terrazzo, which originated in Venice during the 15th century to ennoble the parts of marble not used during the construction of great architectural works. Made entirely of white Carrara marble grit or yellow Siena marble, these furnishing accessories celebrate the excellence of Italian craftsmanship, blending tradition and contemporary design.

Designed to be combined in dynamic compositions, the Axon tables stand out for their variety of materials and colours, playing with different shapes, heights and materials to create elegant and always unique environments.

A variant of the Axon coffee tables involves the use of white bronze, a noble alloy with an elegant light and warm finish. This material, resistant and at the same time full of charm, creates a refined play of contrasts with marble grit, giving the compositions a distinctive and refined character.

If the product is intended for **outdoor use**, it should be used exclusively in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.

To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.

Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.

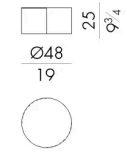

Dimensions

AXON.1050/FU
