Twig

POUF

Generated: 11/11/2026

Twig pouf is a contemporary furniture accessory recognisable by its slender metal rod structure and soft seat, available also in Mongolia fur. It belongs to Twig collection, which includes coordinated small armchairs and stools.

The metal rod wraps around the seat through a continuous, light line, enhancing the minimal design of the structure. An artisanal frosted finish creates reflections on the metal surface.

When upholstered in Mongolia fur, the seat introduces tactile depth and a softer volume, contrasting with the rigour of the structure. The upholstery thus plays the leading role in the product's identity.

Twig pouf can be matched with other seating of the same collection or used independently beside sofas and armchairs.

Handmade in Italy, Twig interprets the furniture accessory through the lightness of metal, comfort and an exploration of upholstery.
