Kevin

COFFEE TABLE

Generated: 09/11/2026

Kevin is a small sculptural coffee table designed to give elegance and character to contemporary the living areas. Its shape arises from the meeting of pure geometries: a conical base and an extremely thin circular top, balancing visual lightness with decorative strength.

The metal base is decorated with engravings, creating a three-dimensional, vibrant surface rich in reflections. The top expresses artistic handcraftsmanship: the handmade frosted finish evokes the care and sensitivity of Italian high jewellery, making the surface a refined, recognisable detail.

Its height allows Kevin to be paired with two small armchairs or placed in a living area alongside sofas and seating. Within HESSENTIA's design language, it is a refined, decorative coffee table combining handcrafted metal, geometric proportion and Handmade in Italy craftsmanship.
