Shelly

POUF

Shelly pouf is a contemporary furnishing accessory defined by the interplay of cylindrical volumes and compact proportions. Its minimal design allows upholstery to become the main character of this piece.

Shelly is available in fabric, leather, or with a further interpretation in cow leather with pony-look effect. Upholstery variations give the pouf a more dynamic, recognisable character.

The seat comes in two heights, allowing it to suit different functions as an occasional seat or an accessory for living and night areas.

Shelly can be used individually or as a pair.

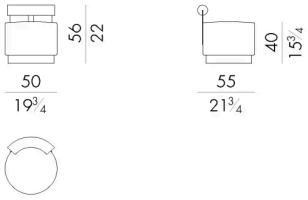

Handmade in Italy, Shelly interprets the accessory through simple geometry and customised upholstery.
