# Isla

## MODULAR SOFA

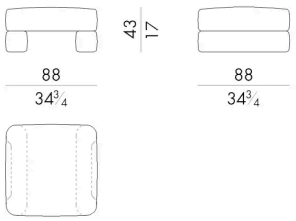

Isla is a modular seating system designed to design contemporary islands of relaxation for indoor sets.
Thanks to its compositional versatility, with just a few modular elements it is possible to create linear, angular or semicircular configurations, suitable to any space requirement.
The combination of soft volumes, gives a welcoming and dynamic look, while the design of the base makes each element independent from the others.
To complete the composition, the circular Isla sofa can be combined.
