Greffage

STORAGE UNIT

Generated: 04/11/2026

The Greffage storage unit is composed of closed and open spaces to contain and display objects and accessories. A metal detail on the external side breaks the patterns creating a play of lights with the surrounding environment.

The elements that compose the storage unit, combined with care, are grafted together giving life to an elegant element whose soft and harmonious lines suit perfectly to any contemporary ambiences.

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
