Euphoria

POUF

Euphoria pouf is defined by the contrast between soft Mongolia fur of the seat and the lightness of the metal structure. It belongs to Euphoria collection, adopting its exploration of upholstery and visually light design language.

The seat is entirely upholstered in white Mongolia fur. The natural movement of the fibres creates depth, surface variations and an enveloping feeling, contrasting clearly with the minimal line of the metal legs.

The slender legs give the pouf visual lightness and are available in brushed bronze or matt gold finishes. Metal introduces a linear, luminous touch, while the upholstery creates a soft texture.

Euphoria can be used as an additional seat or matched with other seating of the same collection. Its compact proportions suit living areas, bedrooms and hospitality ambiences.

Handmade in Italy, Euphoria combines material contrast, comfort and design continuity with the collection of the same name.
