Pedro

COFFEE TABLE

Smooth Pedro coffee table expresses the beauty of pottery through a continuous, bright surface with a soft appearance. Its minimal shape is enhanced by a traditional finishing technique in which glaze and natural earths create subtle shades and colour depth during firing.

The smooth surface enhances the relationship between light, colour and volume, giving the coffee table a simple yet sophisticated look. Each piece has subtle variations arising from the handcrafted pottery process, making the finishes similar but never identical.

Within HESSENTIA's living ambiences, smooth Pedro is a discreet, refined coffee table that engages with sofas, armchairs and lounge arrangements through authentic material, pure shape and a deeply artisanal decorative sensitivity.
