Coco

ARMCHAIR

Generated: 19/11/2026

Coco is an upholstered armchair with bold, sinuous shape, designed to provide a generous, welcoming and visually balanced seat. Its enveloping profile follows the structure through soft, continuous volumes, defining a recognizable look.

Back and seat interact through compact proportions and rounded lines. The continuity of the surfaces accentuates the sense of comfort and gives the armchair a soft yet decisive character, suited to residential interiors, lounge areas and contemporary hospitality projects.

The upholstered section rests on a base obtained through metal casting, introducing a sculptural element with strong visual character. The contrast between the softness of the upholstery and the expressive strength of the metal casting creates a balance between comfort, formal research and Italian craftsmanship.

Coco can be customized through a selection of fabrics and leathers, allowing its character to adapt to different interior projects. The choice of upholstery enhances the continuity of the volume, tactile depth and the relationship between the upholstered structure and the metal base.

Handmade in Italy, Coco interprets the contemporary armchair for HESSENTIA as a synthesis of enveloping proportions, comfort and material craftsmanship.
