Oskar

NIGHT TABLE

Oskar night table is a compact storage element for the bedroom, characterized by essential lines and substantial volumes. It belongs to Oskar collection, which also includes a coordinated chest of drawers with generous proportions, lacquered surfaces and metal details.

The structure features rounded shapes and a compact design in which geometric simplicity is emphasised by the thickness of the volumes. The relationship between solid volumes and soft lines gives the night table a recognizable presence without relying on superimposed decorative elements.

Oskar is available with either a glossy or matt lacquered finish. The lacquer enhances the continuity of the surfaces and allows the product to be customized through different colour combinations.

Metal details with a brushed finish introduce a precise contrast with the lacquered structure and accentuate the functional points of the piece. The metal is perceived as a discreet sign capable of visually lightening the composition.

This night table can be placed beside beds with organic shapes or coordinated with the chest of drawers from the same collection, creating a coherent bedroom through proportions, finishes and design language.

Handmade in Italy, Oskar interprets contemporary bedroom storage through a balance of formal simplicity, substantial volume and colour customization.
