Iconique

ARMCHAIR

Generated: 24/11/2026

Within the HESSENTIA world, Iconique is an innovative sculptural armchair entirely made of bronze. It is in the casting process that the artisan's gesture comes alive, where mastery becomes art and the material acquires character. Born from the encounter between contemporary design, artistic metal casting and Italian manufacturing, its enveloping shape transforms a functional piece of furniture into a recognizable presence interacting with the space like a work of collectible design.

The structure develops through shaped, irregular surfaces that visually lighten the volume and reveal the complexity of the workmanship. Bronze is not used as a simple decorative detail, but becomes the material that composes the entire armchair, defining its shape, character and relationship with light.

Despite the visual solidity of the metal, Iconique offers a welcoming seat and unexpected comfort. The contrast between the expressive strength of bronze and the softness of the lines creates a balance between material, ergonomics and artistic gesture.

Entirely Handmade in Italy and produced through artistic bronze casting, each armchair displays slight variations that reveal the artisanal process and make every piece naturally unique. Traces of handwork, irregularities and variations in the surface contribute to its identity without compromising the precision of the design.

Available in indoor and outdoor versions, Iconique can characterize residential interiors, hospitality spaces and contemporary interior projects. More than a simple seat, within the HESSENTIA world it represents a synthesis of art, material, technique and creativity typical of Italian design.

If the product is intended for **outdoor use**, it should be used exclusively in covered outdoor spaces protected from weather agents, such as verandas, porches, and covered terraces.
To preserve the aesthetic, functional, and material qualities of the products over time, weekly routine maintenance is highly recommended.
Furthermore, any food and drink residues, leaves, flowers, pollen, or bird droppings should be removed promptly to prevent prolonged contact with the surfaces from compromising the long-term preservation of the products.
