

The peculiarity of the table Cheope lies in the eccentric decoration that covers the oval bases, the designer's artistic expression. A thin metal sheet is molded thus creating a surface with a strong three-dimensionality emphasized by a chromatic finish that enhances its texture. Available in different chromatic finishes to obtain the best match with the type of marble chosen. Thanks to the wide range of sizes available for the top, this table fits any dimension of dining room.

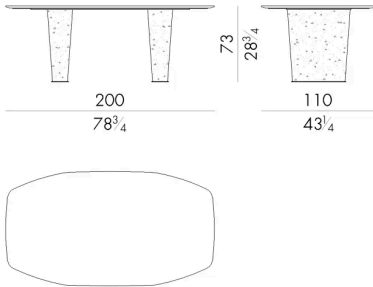

**HESENTIA can customize this piece to suit your project needs. Some limitations apply.**
