# Donald

**VANITY**

Generated: 04/11/2026

The vanity Donald is a composition of shapes with different geometries in perfect balance with each other.

Completely covered in leather, the base recalls the same-named tables collection. Two legs tapered downwards and upwards sustain the top. The vanity has a cylindrical drawer that opens through a rotational movement. The top is equipped with a multi-purpose tray with a lacquered finish and an oval-shaped mirror harmonically fixed to the vanity top.

Its unconventional size and shape make this vanity particularly functional for make-up in the sleeping area.
