

Diamond is an example of a storage unit with contemporary lines, particularly suited to an eclectic living space. The base units, featuring a double 'L'-shaped design, support a storage unit with doors finished with a 'pinstripe' effect. All available finishes have been selected from a wide range of natural colours that can be easily coordinated with other pieces. It is available in versions with three or four outward-opening doors. The distinctive design coherence lends it a modern and exclusive appearance, where art and design are in perfect harmony.

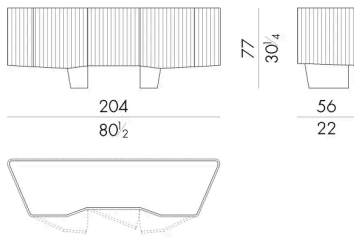

HESSENTIA can customize this piece to suit your project needs. Some limitations apply.
