Cholet

DIVANO COMPONIBILE

Il divano componibile Cholet nasce dal contrasto tra la geometria rigorosa dei volumi strutturali e la morbidezza dei cuscini che completano la seduta. Questa relazione tra parti più definite e superfici soffici costruisce l'identità del progetto e permette al sistema di mantenere una presenza ordinata anche nelle configurazioni più articolate.

La modularità rappresenta il centro progettuale di Cholet. Il sistema comprende oltre trenta elementi differenti per forma e dimensione, dai quali possono nascere più di cinquecento combinazioni. Questa ampiezza permette di progettare composizioni personalizzate in funzione dello spazio, delle proporzioni dell'ambiente e delle differenti esigenze della zona living.

Gli elementi possono generare configurazioni lineari, angolari, profonde oppure progressivamente curve. Cholet può quindi essere utilizzato a parete oppure a centro stanza, in ambienti raccolti così come in living di grandi dimensioni, arrivando a costruire composizioni quasi completamente curvilinee.

I cuscini introducono morbidezza all'interno della struttura e contribuiscono a modificare la percezione dei volumi. Il contrasto tra geometria e comfort evita che la modularità venga letta come una semplice successione di elementi, trasformandola invece in un sistema capace di organizzare lo spazio.

Il divano componibile Cholet è disponibile con rivestimento in pelle o in tessuto. La possibilità di scegliere configurazione e rivestimento consente di adattare il progetto a living contemporanei di dimensioni e caratteristiche differenti.

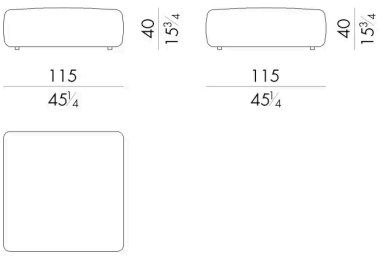

Handmade in Italy, il divano componibile Cholet nel linguaggio HESSENTIA, interpreta il living contemporaneo attraverso ampiezza progettuale, person ;ore geometrico e morbidezza, offrendo

una libertà compositiva particolarmente estesa.
